PROFESSIONAL SUMMARY

United States Marine Corps Network Administrator, Networking Chief, Lead Technical Instructor, and Communications Planning Specialist with experience supporting enterprise and expeditionary network infrastructure in operational environments. Skilled in network administration, systems administration, routing and switching, SD-WAN, SATCOM integration, communications planning, site surveys, and systems integration. Active Secret Clearance with extensive experience supporting mission-critical communications systems, managing high-value technical assets, training personnel, and operating within classified environments.

SECURITY CLEARANCE

- Active Secret Clearance
- 4,000+ hours operating within classified environments and handling sensitive information

CORE COMPETENCIES

Network & Systems

- Network Administration - Network Engineering
- Systems Administration - Routing & Switching
- BGP - IPv4 Addressing & Subnetting
- VLANs & 802.1Q Trunking - SD-WAN
- Windows Server Administration - Linux Administration
- TAK Server Administration

Communications & Integration

- SATCOM Integration - Systems Integration
- Communications Planning - Site Surveys
- Technical Instruction - Leadership
- Troubleshooting

PROFESSIONAL EXPERIENCE

United States Marine Corps

Corporal (E-4) — Networking Chief | Lead Networking Instructor

MOS 0631 Network Administrator | MOS 0621 Radio Operator | MOS 0623 Troposcatter Transmission Systems Operator

- Configure, maintain, and troubleshoot enterprise and expeditionary network infrastructure supporting operational requirements.
- Administer Windows Server, Linux, and TAK server environments.
- Support secure NIPR and SIPR network operations and communications architectures.
- Integrate networking, transport, radio, and SATCOM systems into mission-ready communications solutions.
- Lead network troubleshooting, maintenance, and operational support efforts.
- Maintain accountability and operational readiness of high-value communications assets.
- Provide technical mentorship and training to personnel across multiple communications disciplines.

Survey, Liaison, and Reconnaissance Party (SLRP) — Network Specialist

- Served as the communications and networking specialist for the Survey, Liaison, and Reconnaissance Party (SLRP).
- Conducted communications site surveys, network planning, equipment integration, and connectivity validation for follow-on force operations.
- Assessed communications requirements and developed network support plans for expeditionary and operational environments.

- Coordinated with supported units and partner organizations to ensure communications interoperability and network readiness.
- Provided subject matter expertise on networking, SATCOM, transport architecture, radio systems, and communications planning.

UNITS & OPERATIONAL ASSIGNMENTS

1st Reconnaissance Battalion — Force Reconnaissance Company, 2nd Platoon (1 Year)

- Supported communications and networking requirements for reconnaissance operations, exercises, and deployment activities.

9th Communication Battalion — Bravo Company, Rapid Response Platoon (2 Years)

- Provided expeditionary networking, transport, SATCOM, and communications support. - Served as the network specialist for the Survey, Planning, and Reconnaissance Party (SLRP) team.

LEADERSHIP & INSTRUCTION

Lead Networking Course Instructor

- Delivered more than 5,000 hours of classroom and hands-on technical instruction. - Developed and executed training covering routing, switching, subnetting, SATCOM integration, communications security, and troubleshooting. - Trained and mentored Marines in networking, systems administration, and communications operations. - Served as a networking subject matter expert and technical advisor.

KEY ACHIEVEMENTS

- Worked with and maintained over \$100 million in communications and networking equipment.
- Supported communications services across 200+ network environments throughout military service.
- Supported operational requirements impacting 1,000+ personnel across multiple missions and organizations.
- Extensive experience operating in joint, multinational, and deployed environments.
- Active Secret Clearance.

OPERATIONS & DEPLOYMENTS

Resolute Hunter

- Participated in joint operations alongside MARSOC, U.S. Navy SEALs, Royal Marines, and Australian military forces.

Philippines Rotation 25.2 (6 Months)

- Supported communications and networking operations with 1st Reconnaissance Battalion and 1st Marine Information Group. - Operated alongside Philippine military forces and partner nations including France and New Zealand. - Supported expeditionary communications and network integration requirements during overseas operations.

MILITARY SYSTEMS EXPERIENCE

SATCOM Systems

Starlink | Starshield | MCWS-X | GatorBall | MMT | Hawkeye | Nomad | VSAT Medium | VSAT Large

Troposcatter Systems

TRC-170 | Next Generation Troposcatter (NGT)

Radio Systems

AN/PRC-117G | AN/PRC-160 | VRC-148 | AN/PRC-163

Networking & Security

Cisco PacStar 441/444/447/451 | Cradlepoint Systems | Wireless Access Points | KG-175D | KG-250X/XS | SKL | Firefly | CIK | FTR Keys | PPK | DGSK

EDUCATION

- Computer Science Coursework, Vincennes University
- Computer Science, Central 9 Career Center
